Welcome

to our American Science & Surplus catalog. Here you will find a unique mix of industrial, military and educational items, with an emphasis on science and education. We supply a wide range of unusual and hard-to-find items (some say bizarre stuff) to the hobbyist, tinkerer, artist, experimenter, home educator, do-it-yourselfer, and bargain hunter. Our items are great gifts, inexpensive supplies, and an endless reason for a giggle or a "Gee whiz!" We try to be scrupulously honest in presenting whatever we know about what we have, and always take it back, no questions asked, if the customer isn't satisfied with it. Please remember that we offer many more items than will fit on these pages. You can both peruse and purchase every item we have at our website: www.sciplus.com. Thank you for taking the time to browse our catalog. We appreciate your business.

Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you choose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, American Express, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

The Perfect Stapler

They're going to steal this in a heartbeat, so lock it in your desk. The PaperPro® is the first engineering breakthrough in staplers since, well, the stapler. Push it with one finger's worth of effort and a spring-loaded mechanism (like a center punch) drives the staple with 30 lbs of force through up to (20) sheets of paper. Doesn't even feel like it stapled, but it's foolproof. Use as a hand-held or desk stapler. Opens for use as a staple gun, and with as much power. Takes standard 26/6 staples and comes with (1) rack of them. Measures 7" long x 3-7/8" x 1-1/2" wide, in sleek and elegant black.

Tub Stickers

Time to give the rubber duckies a break. These aquatic-themed dense foam toys from Chipmunk® float, and they'll stick to the side of the tub. There are (30) in the set—crabs, octopi, rays, whales, turtles, starfish and enough fishes to start a Mrs. Paul's plant—so they'll pretty much line the whole tub. Measure 3" to 6" wide x 3/8" thick. The big company with all the trucks gets \$12.50 for these. **WARNING: CHOKING HAZARD—Small Parts. Not for children under 3 yrs.**

Stuff them into your shoes, boots, luggage, drawers or closets, or place them in your car, laundry area, or bathroom, and let them do their thing. Drinking Bird

You're buying the drinks and this wacky, yet debonair, bird with a top hat and plastic base (7" tall OA) can't get his fill of water. Get him started, and he dips his beak into your glass repeatedly. How? Fluid inside his glass body condenses from the evaporative cooling of the water off the bird's beak, making it top heavy and dunking it back into the water. The condensate rejoins the liquid pool in the bird's bulb, and he tips up again. Process continues indefinitely. It works, but it's not any more than moderately well made, and not any more than moderately priced. **WARNING!** The fluid and dye inside the bird can permanently stain, and the bird's glass body can easily be broken. Children are fascinated by the bobbing bird, and the educational possibilities are great. But they should watch him, not fondle him!! Manufacturer warning states this item is not intended for children 8 and under. **WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

Free-Range Soap!

OK, maybe it's not cage-free, but this bar soap is handmade on an Amish farm in Springfield, Missouri, using Abraham Graeber's family recipe, which contains "no cancer-causing chemicals," according to the package. Because this soap is made by people and not machines, it's good for the earth, too. Our each is (5) giant approx. 5-ounce bars, approx 3-1/2" x 2-3/4" x 1-1/4". (For you youngsters out there, bars of soap are what humans used to use to get clean before there were liquid soap dispensers.)

Linus Is Retired

The little tyke appeared in 1952, a worried two-year-old looking for a little comfort in a cold world. With Lucy as a big sister, it's hard to blame him. The math never lies—Linus turned 70 this year, and he had to trade in his blue security blanket for a blue and white Social Security Card Blanket. Looks just like the card in your wallet (which you shouldn't carry in your wallet), and measures 68" x 34" in soft, comforting poly fleece. Even has your name on it: John Q. Public. All you add is a thumb.

97363 Designated Clippers \$3.95/each

Rotten Peaches?

Not if you store them in this double produce basket with wide-open bottoms to let air circulate and prevent mushy fruit. In bright chrome, it measures 14-3/4" x 14-1/4" x 11" tall with a 10" x 9" top basket and an 11" x 11" bottom. Both baskets swing, like banana hammocks, and we know how much bananas like to swing. Kiwis and green peppers, too. Half the retail price, and no need to thank us. A tiny bit of assembly required.

Jolly Barry

Why does Roger always get the credit for the skull and crossbones pirate flag? We feel it is time to share and have elected Barry to the post because he just walked by the vast editorial department here at A.S.&S. (AKA "my desk") Our Jolly Barry flag is 3ft x 5 ft., black polyester with a reinforced edge containing grommets for flying. It has the traditional skull and crossbones in white with the added fillip that the skull is wearing an eye patch! Sail Away!!

These cuties are like Russian nesting dolls, except they have kewpie-ish faces and they're a set of measuring cups. In all-white, heavy, food-safe plastic, the tops hold 1, 2/3, and 1/3 cup, and the bottoms hold 3/4, 1/2, and 1/4 cup, all labeled inside. Hot And Cold Days

The world satellite image on our Night to Daylight mug changes depending on what you pour into it. Fill it with hot coffee, tea or cocoa, and the world wakes up in daylight. As your drink cools, the light goes away and darkness descends. Pretty cool, we must say. Microwave safe, but don't put it in the dishwasher. When the mug shows the world at night, remember that many of the brightest spots on the globe are not necessarily the most-populated.

48825 Day-to-Night Mug **\$9.50/each**

Make Like Moses Cook

That's who the Internets say invented the apple peeler in 1803, but there are a bunch of contenders, so never mind. Just get this hand-cranked stainless steel peeler and corer and start cranking. This one has a chromed threaded shaft, a three-pronged spike, and is spring-loaded, so it adjusts to fit your apples. Mounts on a 4" dia suction base so it's just dandy for today's granite counter tops. Measures approx 12" long, and frankly, it doesn't care if you use it for potatoes, either. Also provides a non-digital source of amusement for children.

Tap Into This

This Lighthouse H2O filtering water pitcher is BPA-free, holds 3-2/3 quarts (that's 3-1/2 liters) and measures approx 11-1/2" tall x 10-1/3" deep x 5-7/8" wide. Filters out solids, heavy metals, pesticides, toxins and chlorine, and then alkalizes the water to a healthy 8.5-10 pH with a pure, silky taste. Includes (2) 6-stage, screw-in filter cartridges with replacement indicators. On the Web, this pitcher sells for 30% more. Just sayin'.

The Naked Dinosaur Mug

Sure, all dinosaurs were naked, but this 14-oz ceramic mug with a white exterior and green inside lets you see under their skin. Featuring pics of multiple dinos on the outside, when you pour in hot liquid, they shed their skin to show their skeletons. Probably some very simple science is involved, but it looks like magic to kids and copywriters. Measures 3-1/2" tall x 3-3/4" dia, with plenty of room for marshmallows. Dinosaurs loved marshmallows—that's why a lot of them lived in marshes. Microwave safe, but hand wash only, please.

Coffee With The Girls

You a fan of Dorothy, Rose, Blanche and Sophia? We thought so. Even folks not on a first-name basis with the characters of the classic '80s-'90s TV show "The Golden Girls" can appreciate this white ceramic 12-oz mug adorned with line drawings of the girls themselves. Under their faces, "The Golden Girls" is written in pink. We don't want to call this a collector's item yet, but you know, give it some time. Limited edition, from Loot Crate™. Hand-wash it, don't soak it, keep it out of the microwave and this mug might be with you well into your own golden years.

48885 Golden Girls™ Coffee Mug **\$5.95/each**

Back To The Back Scratcher

It's back. Once upon a carnival, the bamboo back scratcher was the prize every kid came home with and there wasn't an unscratched back in America—unless the kid came home with a goldfish, which are worthless for scratching backs. Now you can return to those thrilling days of yesteryear with our high-quality, 19" long bamboo back scratcher, and you don't even have to go to a carnival to get it.

The smart cutters and choppers these days are using ceramic knives because they stay so sharp for so long, and who remembers to have their knives sharpened? Ours measure 7" long over all, with assorted colored handles, a 3" blade and a sheath. Don't go into the kitchen without one. Slice, dice, chop and mince, and forget about sharpening. Like you always do.

Fancy-Up Your Drinks

The only thing able to fancy-up a drink quicker than a fancy straw is some oddly shaped ice, and we don't sell ice, not even the regular-shaped kind. We do, however, have these shiny, rose gold-finish decorative straws from Cakewalk™. Measure 7-3/4" long, and you'll get a pack of (24). One-time use, and for cold drinks only, preferably with oddly shaped ice.

Polytetrafluoro-ethylene Oven Liner

Chemists think of it as a synthetic fluoropolymer or tetrafluoroethylene, but you know it as the slippery stuff that food doesn't stick to, and is easy to clean. Whatever. This is a black sheet, 26" x 16-1/4" that will keep goop from sticking to the bottom of your oven or microwave. Cut-to-size-able and cleanable with soap and water. Read the instructions and don't subject it to temps over 500 deg. F.

Our mini clothespins are from Cakewalk™ and you'll get a package of (20), each approx 2" tall x 1/4" wide, in (4) colors: light blue, peach, purple and dark blue. Little details like this can make your party—just sayin'.

13" Flat Screen For \$12.50!

Small for a TV but perfect for keeping the bacon grease from spattering all over your kitchen, and for straining pasta over the sink. Our proper strainer measures 13" dia in finely woven and reinforced stainless-steel mesh. Get a pair so you can always play a little post-prandial kitchen badminton.

They're plastic but you wouldn't know it unless you picked one up. You'll get (30) at 10-1/2" dia and (30) at 7-1/2" dia. Of course they're BPA-free, but don't microwave them. Save Electricity And Valuables

You can do both with this non-functioning, fake electrical outlet that's actually a small safe. Looks like an ordinary off-white outlet, but has a 7" x 2" x 2-1/4" cavity in back. Swap out a real outlet, or use the teensy dry-wall saw that's included and make a new bogus one anywhere you like. This one even takes plugs for further verisimilitude. We suggest putting a burnt-out bulb in the lamp you plug into this outlet to fool the smarter burglars. Always work at least one step ahead.

Not The Sharpest Knife In The Drawer?

Not you—we were talking to your favorite kitchen knife, or the one that used to be your favorite before it got dull, and it said yes, it's not the sharpest knife in the drawer. It's depressed, and it wants you to buy this Mozzbi tungsten and ceramic 2-stage sharpener. Self-adjusting for anything from paring knives to chef's choppers, it can be used on any straight knife. A few pulls through the coarse side, and same on the fine side, and you'll be slicing like d'Artagnan through Cardinal Richelieu's guards. Too soon?

Western Spaghetti

We regularly inflict a lot of dumb puns on you, and we see no reason to stop now, which is why we present this Spaghetti Western Spaghetti Measurer marked "The good, the bad, and the al dente." Features a cowboy, who looks nothing like Lee Van Cleef, shot full of holes of graduated sizes marked for measuring pasta for one, two, three or four persons. We're assuming it was a gunfight of assorted calibers. Cowboy measures approx 8" x 7-1/2" x 1/8" thick, in hard plastic. When it's time to store him, you can hang him by the hole in his hat.

Egg Guillotine

If you want to make an omelette, you have to break some eggs. But now you can automate the tedious process. Just stick the egg between the little rings, squeeze the handle, and the Clever Cracker breaks it and drops it into the detachable egg separator. But wait—that's not all! The package also includes the battery-operated Clever Scrambler. Put the egg in the little bowl on the Scrambler, push it down so the tiny scrambling wand is inside the egg, push the button, and the egg is scrambled from the inside, without your ever having to witness the ignominious deed. You add is a pair of "AA" batteries.

Ouch!

Looks like a cheap kid-sized tennis racket, but brother, this ain't for the kids. It's actually a fine way for adults to work on their upper-body strength and kill bugs at the same time. 18" long, with a 6" wide paddle lined with metal grid. A coil in the handle sends high voltage through the paddle when a button is pushed; hit a bug with it and the bug will bug you no more. But despite the manufacturer's claims that it's safe for people, Scott reports that flesh-paddle contact delivers a nasty shock, nasty enough to say "Keep this away from kids!" The Noble Pigeon

It's real name is the Rock Dove, and it ought to be the national bird. Doesn't fly south for the winter like those wimpy geese, never swoops out of the sky to eat unsuspecting bunnies like bald eagles, just minds its own business and eats whatever you drop on the El station platform. It's not even bald. This hard vinyl version is gray with a rosy breast, and it measures 5" beak to tail. Wind it up and watch it bounce and bob around. Take it home, and it's a homing pigeon.

Betcha don't have one of these puppies in your toy box. Sticky the Plunger is a red and yellow plumber's friend, in the classic shape, approx 3" dia on a 4" foam handle, with a business end that's made of moldable gooeey stuff. It also comes with a metal display stand, weighted at the bottom to prevent spills. Slide Show

Microscope glassware for examination of blood, pond water, mold, and other minutiae. All of the microscope slides are optically clear glass 26mm x 76mm (about 1" x 3"), between 1mm and 1.2mm thick. The well slides, of course, have a concave well to hold a drop of liquid. Our each is a package of (12) well slides, or a box of (72) standard slides with ground edges. Cover glasses are the smaller and very thin pieces of glass used as the top of the glass slide sandwich. They are often used temporarily by simply dropping them onto a drop of liquid to flatten and spread it and to minimize evaporation. More confident microscopists will cement them in place to permanently preserve a specimen. Our each is a package of (100) cover glasses 18 mm square, #1 thickness (0.13mm to 0.17mm). If you need one, you need both.

Be More Vacuous

At least pack more vacuous, because vacuum packing isn't just for coffee, it's for saving storage space for anything soft and squoosable. We suggest this 6-pack of 40" x 32" large vacuum-seal storage bags, into which you can stuff pillows and blankets and sweaters and overcoats and stuffed monkeys and any number of other things, then suck out all the air with the

enclosed hand pump and watch it shrink by 80% so you can slide it under your bed and forget about it for mold and moth-free years. (OK, it's not a pump, because it sucks, so call it a handy little sucker.) Also dandy for travel because the little sucker doesn't take up much space, so you can shrink your return laundry too—and keep it hermetically sealed. Works even faster with a vacuum!

Beauteous Brass Sextant

Sextants came along after astrolabes but before GPS. (Just like you.) They're used for finding latitude and the distance between objects, and are still the non-electric, non-satellite-dependent back-up for navigators. Ours is a beauty in solid brass with glass optical components, at a tiny price. Measures approx 4-5/8" x 4-1/4" x 3-1/4" OA and comes in a very nice wooden case. Includes instructions for use, which you're going to need unless you went to Annapolis where they still teach it because computers can still go all kaffloey. (Note that well before computers started going kaffloey, compasses and sextants lost an adventurer here and there, too, so don't call us if you and the sextant set out for Madagascar and end up in Iceland.)

You Won't Believe Your Eyes!

Surpsies rejoice! This might be our deal of the year. We recently acquired a boatload of high-quality reading glasses (not cheapie five & dime store readers) in soooo many styles and colors, with magnification ranges of 1.00-1.75 and 2.00-3.00. Some are sunglasses, some have spring hinges, some have a case, and all originally sold for \$10 to \$30 each. So get this: we'll send you (5) of them for less than \$15. We promise you'll get (5) different frame styles and at least (2) different magnifications. But remember: the styles vary wildly, from classic to eye-catching. With that in mind, remember: you get what you get, without throwing a fit. Isn't surplus wonderful!

A Pyramid of Prisms

Polished glass equilateral prisms. Equilateral because each edge of the end is the same length, 32mm. Thus, as all you geometry students know, each of the angles is also the same, 60 degrees. It's the Hollywood Selfie Pole Monopod, and the name alone is making us go all soft in the middle. Starts out 8-1/2" long and extends to a very sturdy 39" with a camera thread at the end to hold the cell-phone holder. And like many people in Hollywoodland, it probably won't work as intended. Lazy Scott Bearings

Never seemed fair to nail the "lazy" tag so permanently on the "Susans" but that probably has no "bearing" on the issue. Also called turntable bearings, they are the square, flat ball bearing devices YOU bolt between two flat objects to achieve rotation. Like that spinning center section of a Chinese restaurant table. We had these in surplus once and they were quite popular. To our chagrin, we discovered they could be bought commercially for the same price. So we did. Peltier Heat Pump

High tech comes to Am Sci & Surp!! It is here in the form of a Peltier junction, a thermo-electric device that translates electric power into heat, and perversely, into cool. Apply current at 15VDC to the gizmos and they extract thermal energy from one face, thereby cooling it. The heat is dumped onto the other face, thereby heating it. Please note: you must use a heat sink on the hot side or the junction will fry itself, since it can quickly create a 65° C temperature differential in a no load situation. Stack two, or build a cascade to increase the thermal differential created. Or run it backwards. Apply heat or cold to the relevant face and produce a current. Amazing for science projects and experiments. Practical for coffee warmers, beer coolers and mini-refrigerator or warming oven applications. They come with a datasheet. Large is 1-9/16" sq. x 3/16" thick and draws 6A and small is 1-1/4" sq. x 3/16" thick and draws 3A.

Somewhere, Over The Door...

Since the corner of a door has only so much real estate to hang stuff on, we all need to expand at some point. We do it with these durable, stylish, chrome-looking over-door hooks. No screws or drills needed. Just slip them over the top of any door up to 1-5/8"—bathroom, bedroom, entry, craft room, workshop, garage—and watch how much stuff ends up hanging from them instead of piled in a heap. They hang down 9" and stick out about 7" from the door, with a nice round ball on the end, and require a mere 1/16" clearance at the top for the door to close. That's not a problem for most doors. Our each is a (3)-pack.
